Advanced Placement (AP) Exam Assessment

- A. A high school graduate who has taken the Advanced Placement Examination conducted by the College Entrance Examination Board (CEEB) and who has passed with a score of 4 or 5 may receive university credit for that examination. The credit awarded will be treated as transfer credit and will count toward graduation. Additional information about transferring AP credit may be obtained from the Admissions Office or the Life Directions Center.
- B. AP transfer equivalencies are based on current transfer policies and may be subject to change. Students should check with their LDC advisor to verify the transferability of AP credits into their chosen degree program.
- C. Advanced Placement (AP) Policies:
 - a. Students must take the AP tests as administered by CEEB. Final grades in high school AP classes are not sufficient to prove competency in a subject.
 - b. Official AP scores must be received directly from College Board.
 - c. CCU considers AP credit as transfer credit. However, students who transfer 12 hours or more of AP credit will still be required to participate in INT101 (FYI). AP credit may not be included in calculating a student's hours in determining that student's involvement in FYI.
 - d. AP credit may be included in determining a student's advanced standing.
 - e. Credit will only be granted for AP credit that will fulfill a student's program requirements.

Science majors will receive credit toward direct equivalencies pertaining to their major (i.e. BIO101/111, etc.) for courses listed with an asterisk (*) symbol; science courses listed below will fulfill the course requirement for SCI230 (Integrated Physical Science with Lab) to fulfill the general education requirement for all Non-Science majors. Additionally, BIO101/111 is for Elementary Education majors, i.e. Non-Science majors. BIO101/111 does not fulfill BIO120/121 for Biological Sciences majors. While these courses may be credited to the science major, it is the student's responsibility, with consultation by an LDC Advisor and/or faculty, to determine, based upon the student's future career plans, whether to use these credits or re-take the courses at CCU. Education majors will need to work with their advisors and/or the School of Education to allow these courses to fulfill science/lab requirements directly.

Additionally, please note that any course that is a prerequisite for admission into a Graduate or Professional School may not be taken as AP credit, but must be taken from an accredited four-year degree-granting institution. For example, AP credit for Biology, Chemistry, Physics, or Calculus would not fulfill the prerequisites for admission to medical school.

COLORADO CHRISTIAN UNIVERSITY College of Undergraduate Studies

AP Test Subject	Min Score	Credit Hours	CCU Equivalency
Art and Design: 2-D Design	4	3	Elective
Art and Design: 3-D Design	4	3	Elective
Art and Design: Drawing	4	3	ART 101
Art History	4	6	HUM 120; Elective
Biology (BIO 120/121 not eligible for credit by examination)	4	4	BIO 101/111
Calculus AB	4	4	MAT 141/142
Calculus BC	4	8	MAT 141/142 and MAT 241/242
Chemistry	4	5	CHM 121/131/141
Chinese Language & Culture	4	6	Language Elective
Computer Science A	4	3	CIS 130
Computer Science Principles	4	3	Elective Credit
